DETAILED ACTION

Drawings

1. Figures 4-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to because "DIFFERENCE" is not a correctly spelled word, and the language defined S5 of Fig. 2 should be modified to correctly describe the action. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2644

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al (US 5,757,937).

Itoh et al disclose a noise level updating system with a detector means (Fig. 8, the input signal $S(f)$), a noise level holding section (P_{thold}), determining means (25A) and updating means (25B).

Regarding claim 2, Itoh shows the step of determining updating when the difference between the subsequent noise levels is smaller than a predetermined value (S_2 in Fig. 2) and the difference between the held noise level and the subsequent noise level is larger than a predetermined value (S_4).

Regarding claim 3, the claimed average value of the subsequent noise levels read on "P" in step S4 of Fig. 9 (col. 10, line 32).
